

# Corn Program

## **Seed Treatment**

### **Invigor8 Plus - 4 oz per 80,000 seeds**

50-unit sizes are available. Designed to accelerate germination and seedling emergence.

## **In-Furrow**

### **Carbose - 8 oz per acre**

A highly concentrated energy source with beneficial microbes.

### **VitaNTerra+ - 16 oz per acre**

A powerful blend of organic acids and nutrients.

### **Immerse - 16 oz per acre**

A liquid soil and foliar supplement to help enhance plant immunity, energy, and growth.

### **Revita-N - 16 oz per acre**

Our premium biological product with nitrogen-fixing microbes.

## **Nitrogen Placement**

### **VitaNTerra+ - 32 oz per acre per 50 lbs of nitrogen**

A powerful blend of organic acids and nutrients.

## **Post-Emerge Application**

### **Carbose - 8 oz per acre**

Provides a food source for your native bacteria and fungi to assist the young seedlings.

### **VitaNTerra+ - 16 oz per acre**

A powerful blend of organic acids and nutrients.

### **MicroBoomL - 16 oz per acre**

Provides a nutrient stimulus package that creates energy in the cell structure and stimulates soil biological activities.

## **Disease Management**

### **Carbose - 8 oz per acre**

Provides a food source for your native bacteria and fungi to assist the young seedlings.

### **Instigo - 12.8 oz per acre (Optional, disease management)**

Biological "probiotic" to help protect against pathogens.

# Corn Program

## Notes

- Buffer spray water pH of 5.5-6 prior to adding product.
- Other nutritional needs may need to be addressed throughout the growing season. Products to meet those additional demands may include Nitrogen (Fulcrum N), Phosphorus (Fulcrum P), Potassium (Fulcrum K), Iron and Moly (MoFe), Manganese (Ready Man), Zinc (Fulcrum Z), Calcium (Fulcrum Cal), and Boron (Stable B), Silica (SilaKate).
